

When Children are Refugees: Pediatric Health Care in Refugee Camps

October 7, 2013
9:00am – 11:00am
George Mason University
Founders Hall
Arlington, VA

Co-sponsored by the [World Medical & Health Policy](#) journal, the [Policy Studies Organization](#), the [Center for International Medical Policy and Practice](#) at the [School of Public Policy](#) and the [Biodefense Program](#) in the [Department of Public and International Affairs](#) at [George Mason University](#).

Dr. Najwa Khuri-Bulos, Professor and Division Head, Infectious Disease, Department of Pediatrics, Jordan University Hospital, and **Dr. Ronald Waldman**, Professor of Global Health at George Washington University's School of Public Health will discuss pediatric health care at Jordan's Zaatari refugee camp and the problems that prevent an international standard for pediatric health care in refugee camps.

Dr. Khuri-Bulos, has written and spoken on "The Role of Immunization in Achieving the Millennium Development Goals," and is responsible for the immunization program Jordan established for children living at Zaatari. Dr. Waldman, former Technical Director of the USAID-funded BASICS program, a global child survival effort, is President of the Board of Directors of Doctors of the World-USA.

For additional information regarding the program, please contact Dr. Denise Baken at dbaken@gmu.edu
